

KBULG's Updated Native Plant Guide out now

KBULG has produced a second edition of its Native Plant Guide for Karlkurla Bushland Park & the Goldfields, originally published in 2003. KBULG's native plant guide is a must-have for plant enthusiasts as it not only contains detailed information about species' characteristics, species' habitats and traditional anthropogenic uses, but also gives away other interesting facts rarely mentioned in conventional plant guides. It's also the perfect plant guide for plant-interested newbies to the region because high-quality images make plant identification easy and fun.

You can request a copy of the plant guide directly from KBULG (admin@kbulg.org.au) or purchase the guide from visitor centres in the Goldfields region.
