22 MAY 2020
**INTERNATIONAL DAY FOR
BIOLOGICAL DIVERSITY**
Our solutions are in nature

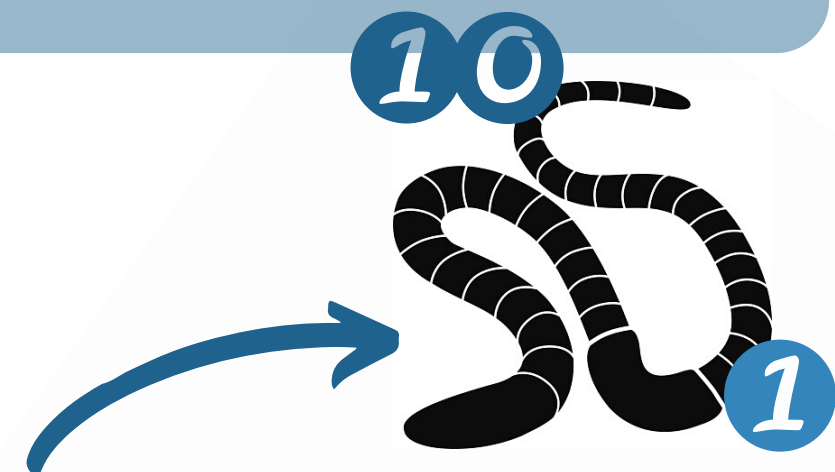

As the global community is called to re-examine its relationship to the natural world, one thing is certain: despite all our technological advances we are completely dependent on healthy and vibrant ecosystems for our health, water, food, medicines, clothes, fuel, shelter and energy, just to name a few. The slogan "Our solutions are in nature" emphasises hope, solidarity and the importance of working together at all levels to build a future of life in harmony with nature. 2020 is a year of reflection, opportunity and solutions. It is expected, from each of us, that we will "Build Back Better" by using this time to increase the resilience of nations and communities as we recover from this pandemic. 2020 is the year when, more than ever, the world can signal a strong will for a global framework that will "bend the curve" on biodiversity loss for the benefit of humans and all life on Earth. - Convention on Biological Diversity.

Click on the ant to go to the WWS Compost Booklet & try some of the activities the ants have suggested to explore biodiversity in composting.

One of our biggest threats to biodiversity loss is the need for resources. Let's talk about the changes we can make by adopting the REDUCE, REUSE & RECYCLE principles and how to achieve a better harmony with nature.

Shh...don't tell anyone but this WWS Booklet is full of information and fun adaptable activities!

Why not celebrate biodiversity by discussing all you know about earthworms and trying a fun activity from the WWS Worm Booklet.

If you don't have a worm farm chat to Gabrielle about borrowing some of her worms to show the class!
